

We Are Architects!

Dear Families,

We have been talking about different types of houses and the materials that are used to make them. Children are learning that some parts of houses, such as doors, can be made out of wood. Ask your child what they know about wood. They might say that wood comes from trees. Some wood can be hard and thick. Some wood can be brown. They might remark that you can't see through wood.

Go on a treasure hunt around your house. What objects can children find that are made out of wood? How do they know? Invite your child to draw a picture of what they find in the boxes below.
